

A TOP-NOTCH INSTITUTION RISING ABOVE EXPECTATIONS

AUM is designed to provide an intellectually challenging yet engaging and authentic academic environment with the student at the centre of everything that happens

Adopting an interactive learning approach that facilitates the development of committed, ethical, and professional leaders, American University of the Middle East (AUM) in Kuwait delivers applied and theoretical knowledge. It is an institution seeking constant improvement of its students' skillset, providing them with a solid academic foundation and placing them in the best position to reap the rewards and seize opportunities. Through its affiliation with Purdue University in the US, since it was founded in 2008, AUM strives continuously to meet the highest academic national and international standards. With 1,544 students enrolled in fall 2011, the number of total enrollments is significantly increasing each year and has reached more than 10,000 in AUM and ACM in fall 2016.

AUM offers various majors and programmes in engineering and business. It has also acquired licenses for health sciences majors such as nursing and medical studies. The offered academic curricula is meticulously developed by Humansoft to reflect AUM's educational philosophy and is being delivered by widely experienced faculty members.

The College of Engineering and Technology offers several academic programmes in industrial, computer, electrical, mechanical, and chemical engineering, in addition to information system technology as well as telecommunications and networking technology. Students enrolling in these programmes are given an opportunity to develop a strong background in engineering sciences, combining theory with application in order to build critical design, analytical and behavioral skills necessary for an active integration in multidisciplinary technical environments.

Furthermore, with the support of Purdue University, AUM launched its own Nanotechnology Research Center in 2015, dedicated to nanoscience and nanotechnology.

The College of Business Administration emphasises learners' personal and professional development by employing state-of-the-art business education. The college offers bachelor degrees in accounting, finance, management information systems (MIS), marketing, and human resource management.

The college also offers an MBA programme designed to provide balanced interdisciplinary coverage of all management functional areas, shaping leaders who are able to recognise and solve complex business problems. The MBA programme enhances critical thinking, practical skills, and expertise in the use of models and problem-solving tools along with professional and interpersonal skills.

AUM seeks to create visionary, motivated, and reliable young leaders by offering them personal development skills, employment opportunities, and career support through the "Tawteen" programme, as well as a research centre designed to address the specific needs of Kuwait, the GCC, and the Middle East.

Through extensive research focusing mainly on topics such as energy, environment and health, economic development, social development, advancement of learning, in addition to information technology, applied mathematics, scientific computing and automation, AUM is positioning itself as a pillar in the research arena. Moreover, with its new theatre and convention center on the way, AUM is redefining the shape and philosophy of educational institutions in Kuwait and the region.
